Project #5 (September 2014 – January 2015):

Project Title : Genband SBC
Technology : .Telecom(C/C++, SIP/VoIP)
Role : Software Developer
Company : GlobalLogic

Description:

Session Border Controller(SBC)- SBC is a device used in Voice over Internet Protocol (VoIP) networks to exert control over the signaling and usually also the media streams involved in setting up, conducting, and tearing down telephone calls or other interactive media communications. SBCs usually sit between two service provider networks in an interconnect environment, or between an access network and a backbone network to provide service to residential and/or enterprise customers.

Responsibilities:-

- 1- Develop new requirements and improve the existing functionality also.
- 2- Resolve the defect if any.
- 3- Worked on SIP/VoIP, Linux System.

PROJECT WORK AND SUMMER TRAINING

1. **Title** : **Implementation of Oscillators Using CFOA**
Description : In the project we implemented the oscillator using different configurations of CFOA and tried to achieve different frequencies of oscillations.
 2. **Title** : **Low Power Low Voltage Flip Flops**
Description : Studied the existing flip-flops and made modifications in their design with an objective of reducing delay while simultaneously reducing power.
 3. **Title** : **Security System**
Company Name : Ducat
Description : In the project we used Hardware Description Language (Verilog) to design the basic security system.
 4. **Title** : **Java Remote Control**
Company Name : NIIT
Description : To Setup a Connection between Mobile Phone and Computer through a Bluetooth Connection.
 5. **Title** : **Cognitive Radio**
Company Name : DEIT/MCIT
Description : A cognitive radio is a transceiver designed to use the best wireless in its vicinity. Such a radio automatically detects available channels in wireless spectrum, then accordingly change its transmission or reception parameters to allow more concurrent wireless communications in a given spectrum band at one location.
